

CASE STUDY

The Glade, Ascot

Luxury house developer Montrose Developments, required the installation of wetrooms and waterproofing solutions into this stunning gated development in Ascot.

THE CHALLENGE

Montrose Developments build exclusive homes in Berkshire and Surrey with exceptional levels of quality and finish. They have been building exclusive homes in these areas for the last twenty five years. The Glade is a stunning gated development of three executive homes in South Ascot, each consisting of beautiful reception rooms and five bedrooms with luxury en-suites.

Wetrooms UK were approached by Montrose Developments to supply wetroom systems and install comprehensive waterproofing solutions into the Master Bedroom and Guest En-suites. The systems needed to be suitable for use on screeded floors.

THE SOLUTION

Wetrooms UK recommended the installation of Linear Wall Drains into all of the en-suites, which were then laid to fall. The Linear Wall Drain has a shallow depth of only 67mm, making it ideal for installation in shallow floor construction. The waterless, spring loaded trap ensures the drain cannot dry out in periods of low use.

RIW Tilesafe waterproof membrane was applied to the floor and wall junctions across the entire shower area of each bathroom. RIW Flexible Wall Membrane was applied full height to the shower walls, finishing 2.2m outside of the shower area, linking to the floor membrane, to prevent any water penetration.

Stone Infill and Solid Stainless Steel grills of varying sizes up to 1 metre in length were installed, giving the contemporary wetrooms a stunning finishing touch.

CLIENT TESTIMONIAL:

“From design and manufacture, to on-site installation, Wetrooms UK have provided us with a very professional service.

Their unique 10 year installation guarantee provides Montrose Developments with the peace of mind that the luxury wetrooms are watertight for our clients.”

Andy Lucas
